See our funding page at - http://www.fqm ltd.com/training-funding.html

This workshop will provide an overview for delegates of:

Planning, performing and reporting the results of internal quality audits with the aim of developing and improving the quality management system of an organisation. To help delegates understand the key attributes of an efficient and effective quality management system and the role of the internal auditor in its continual improvement and development.

This course is ideally suited for Quality Managers and other employees who will undertake internal quality audits, or who will be required to plan, manage and implement internal audit programmes. Other people who find this course useful are team leaders and supervisors in quality-driven organisations, who are looking to broaden their awareness of quality issues in order to understand how they can improve their overall contribution to the success of the business. The course does not require any past auditing or quality management experience.

Key Topics in the Course:

- The contribution internal quality audits can make to the effectiveness of your management system.
- Plan-Do-Check-Act methodology and other fundamental quality management principles
- Roles and responsibilities of an Internal Quality Systems Auditor
- Business process auditing
- The structure and principles of the ISO 9000 series standard
- Quality management system implementation issues
- Verify that current practice in your organisation conforms with defined requirements
- Effective auditing techniques and good audit practice
- Corrective action - what is it and who is responsible for taking action
- Following up; verifying the effectiveness of corrective action; and closing out

Duration:
2 Days

Cost:
£490 per person plus VAT
